

**Server Purchase 2011**

The new server will replace server RMLIB002 and upgrade the RMLIB003 server Operating System.

The server contains shared files, Department Drives (for example IT), personal drives (H Drive) and two printers for the network. It also contains the network console for Anti-Virus Software. This server is currently 6 years old. It is generally recommended it be replaced on a 5 year cycle but no later than 7 years. This server purchase will also update the secondary server software to a more current standard. This update should eliminate the need to purchase a new server in 2012 as reflected in the normal server purchase schedule.

**Quotes****PACE Systems, Inc.**

Hewlett-Packard Smart Buy DL370 G6 E5649 2.53G 2P 8GB SVR with ports, memory, power cable, and electronic HP Care Pack Hardware Support. No software included. **\$6,424.00**
