

3

STEP 3: Position streaming player

Place your streaming player near your TV.

DO NOT place your streaming player behind the TV or inside a closed TV cabinet. Doing so may cause overheating.

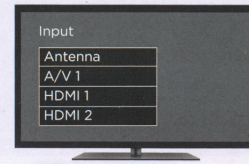

DO

Make sure that the front of your streaming player has direct line of sight to your remote control.

5

4

STEP 4: Select input

Use your TV remote to power on your TV and select the input (source) you used to connect your streaming player.

STEP 5: Connect to your home WiFi.

6

STEP 6: Start Watching

Common questions

What should I do if my streaming player is not connecting to my Wi-Fi® network?

Double check the network you selected and that you entered your password correctly. If you have other devices connected to this network, your streaming player should connect.

You'll find additional instruction videos available at rmlib.org/roku.
